

DR TAN LM ARCHITECT

The Winning Project:

NO.18 HOUSE

Designer: Dr Tan Loke Mun

SUSTAINABLE CONCEPTS

What have you been working on lately?
Some very small projects.

Where do you usually draw inspiration for design?
Source of inspiration differs for each project. Sometimes divine but mostly from vain imagination.

What do you think is the best renovation one can do to their home?
By getting rid of clutter or better still... by moving out.

What's your current paint colour obsession?
Black ... because it is not a colour

What's your favourite book?
The Bible and my sketchbook

What has been the biggest challenge in your career, and how did you overcome it?
Biggest challenge is to draw, write and build more. I am overcoming these by drawing more, writing more and building better.

For this project that made it to the MFID Top 10, what is the story behind the design?
It was a house for a good friend and super builder. He wanted something sustainable, sufficient and different.
