# Best Landscape in Malaysia

Awarded by the Institute of Landscape Architects Malaysia (ILAM)

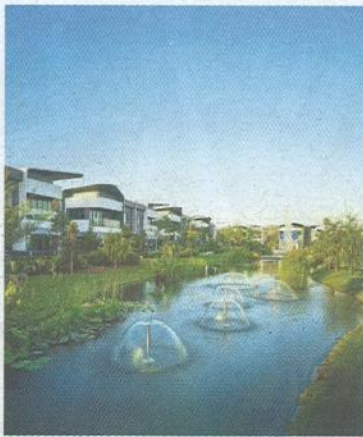

Refreshing water and fertile land – the best of both elements are found in Setia Eco Glades, Cyberjaya, the exciting waterfront eco-development with eight distinct live islands on a calm lake, built according to CIBI-certified guidelines. Over 150 species of flora and fauna find sanctuary here. It is no wonder that Setia Eco Glades' Lustrum Gardens won both ILAM's Malaysia Landscape

Architecture Awards (MLAA) 2015 Project of the Year Award and Excellence Award. Come on over, make and drink in the beauty of the eight unique fountains, lush themed gardens and the butterfly sanctuary. ## THE WINNING STREAKS

### Lepironia Gardens at Setia Eco Glades, Cyberjaya, Selangor

The Lepironia Gardens was designed to encapsulate a sense of peace, calm and tranquillity within the development. A fresh man-made waterway was carefully designed as the main attraction. The design enhances the value of the entire site by replanting original site vegetation partly from transplanted trees and wetland plants. Native resident fish were released into the completed waterways in order to create a balanced ecosystem. The Orchard Garden is designed to ensure bird and insect integration with plants for food and nectar which invite butterflies that flutter gently throughout this lush garden. The Lepironia Garden was crafted with an eco-landscape approach, which inspires human integration with nature. This approach is not only focused on the importance of conservation and preservation but also creates awareness among the community about the need for a sustainable environment.
